Advanced Network Training

**CCNP Security: Securing
Cisco Networks with
Firepower (SCNF 300-710)
bootcamp**

with Todd Lammle

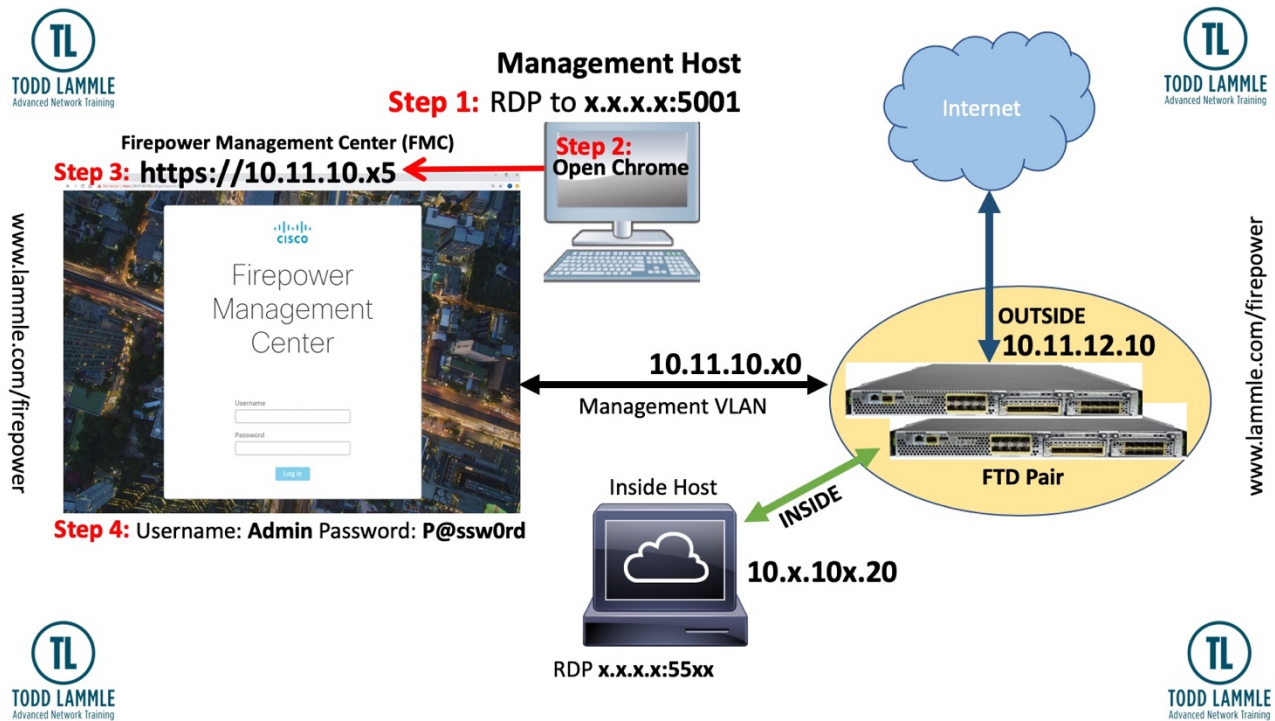

Receive an advanced copy of Todd Lammle's NEW
CCNP Security SCNF Study guide!

This is *not* a vanilla Firepower class as *all* the Cisco partners run. Todd Lammle is the most experienced Cisco Firepower instructor in the world, with over 10,000 FTD installs.

His experience is second to none, and most partners have Cisco Firepower instructors that installed no Firepower at any customer.

Todd Lammle has been provided advanced Cisco Firepower training and consulting full time since 2013.

You will receive your own pod of gear that you can use all through class with *two* FTD devices, and *two* additional days after class end date! No sharing of pods!

Outline

There are over 70-hands-on labs in over 40 chapters to help you really understand the material and how understand how Firepower works! This intense class covers every feature, policy and configuration available on the Cisco Firepower product

Introduction

- Chapter 1: Install FTD on an ASA (Optional)
- Chapter 2: FMC Management Configuration
- Chapter 3: System Configuration
- Chapter 4: Health Policy/Health Alerts
- Chapter 5: FTD Device Management
- Chapter 6: Adding your FTD Devices into the FMC
- Chapter 7: FTD CLI/LINA
- Chapter 8: Migrating an ASA to FTD
- Chapter 9: FTD High-Availability
- Chapter 10: FTD Interface Configuration/Zones
- Chapter 11: Routing
- Chapter 12: Objects
- Chapter 13: Access Control Policy
- Chapter 14: PreFilter Policy
- Chapter 15: Network Addressing Translation (NAT)
- Chapter 16: Access your inside network and testing attacks
- Chapter 17: Malware/File Policy
- Chapter 18: Intrusion Prevision Policy (IPS)
- Chapter 19: Platform Settings (FTD/Firepower)
- Chapter 20: Identity Policy
- Chapter 21: Firepower Discovery Policy
- Chapter 22: Account Management
- Chapter 23: Quality of Service (QoS)
- Chapter 24: Intrusion Event Analysis
- Chapter 25: Reporting and Task Management
- Chapter 26: Advanced Network Analysis Policy (NAP)
- Chapter 27: DNS Policy
- Chapter 28: Advanced FTD Troubleshooting
- Chapter 29: FTD FlexConfig
- Chapter 30: Threat Intelligence Detection (TID)
- Chapter 31: Site-to-Site VPN
- Chapter 32: FQDNs
- Chapter 33: Correlation Policy
- Chapter 34: SSL Policy
- Chapter 35: Firepower Domains
- Chapter 36: SafeSearch
- Chapter 37: Configuring Custom Application Detectors
- Chapter 38: AnyConnect
- Chapter 39: ISE with PxGrid
- Chapter 40: Final Lab

EXAM Information:

Securing Networks with Cisco Firepower (SNCF 300-710)

Securing Networks with Cisco Firepower v1.0 (SNCF 300-710) is a 90-minute exam associated with the CCNP Security and Cisco Certified Specialist - Network Security Firepower certifications. This exam tests a candidate's knowledge of Cisco Firepower Threat Defense and Firepower, including policy configurations, integrations, deployments, management and troubleshooting. These courses, Securing Networks with Cisco Firepower, and Securing Network with Cisco Firepower Next-Generation Intrusion Prevention System help candidates prepare for this exam.

The following topics are general guidelines for the content likely to be included on the exam.

1.0 Deployment

1.1 Implement NGFW modes

- 1.1.a Routed mode
- 1.1.b Transparent mode

1.2 Implement NGIPS modes

- 1.2.a Passive
- 1.2.b Inline

1.3 Implement high availability options

- 1.3.a Link redundancy
- 1.3.b Active/standby failover
- 1.3.c Multi-instance

1.4 Describe IRB configurations

2.0 Configuration

2.1 Configure system settings in Cisco Firepower Management Center

2.2 Configure these policies in Cisco Firepower Management Center

- 2.2.a Access control
- 2.2.b Intrusion

- 2.2.c Malware and file
- 2.2.d DNS
- 2.2.e Identity
- 2.2.f SSL
- 2.2.g Prefilter

2.3 Configure these features using Cisco Firepower Management Center

- 2.3.a Network discovery
- 2.3.b Application detectors (Open AppID)
- 2.3.c Correlation
- 2.3.d Actions

2.4 Configure objects using Firepower Management Center

- 2.4.a Object Management
- 2.4.b Intrusion Rules

2.5 Configure devices using Firepower Management Center

- 2.5.a Device Management
- 2.5.b NAT
- 2.5.c VPN
- 2.5.d QoS
- 2.5.e Platform Settings
- 2.5.f Certificates

3.0 Management and Troubleshooting

- 3.1 Troubleshoot with FMC CLI and GUI
- 3.2 Configure dashboards and reporting in FMC
- 3.3 Troubleshoot using packet capture procedures
- 3.4 Analyze risk and standard reports

4.0 Integration

- 4.1 Configure Cisco AMP for Networks in Firepower Management Center
- 4.2 Configure Cisco AMP for Endpoints in Firepower Management Center
- 4.3 Implement Threat Intelligence Director for third-party security intelligence feeds
- 4.4 Describe using Cisco Threat Response for security investigations
- 4.5 Describe Cisco FMC PxGrid Integration with Cisco Identify Services Engine (ISE)
- 4.6 Describe Rapid Threat Containment (RTC) functionality within Firepower Management Center
