
Todd Lammle's AWS Certified Solutions Architect Training

AWS Class and Video Table of Contents

Section 1 – Introduction

- AWS Intro part I the cert process
- Intro part II-The Lab Process

Section 2 - Fundamentals of AWS

- Evolution of AWS
- Regions and AZs
- AWS Services Offering
- Managed vs. Unmanaged Services

Section 3 - Billing, Accounts, and Organizations

- AWS Using the AWS Free Tier
- AWS Configure Billing Alerts
- S3L3 - Using Cost Explorer to Analyze Charges
- Consolidated Billing for Multiple AWS Accounts
- Introduction to AWS Organizations
- Demo - AWS Organizations

Section 4 – Security

- AWS The Shared Responsibility Model for Security
- AWS Identity and Access Management – IAM
- AWS Configuring IAM Policies
- AWS Security Token Service (STS)
- AWS Web Identity Federation for AWS Authentication
- AWS Trusted Advisor
- AWS IT Audits and Penetration Testing

Section 5 - Simple Storage Service (S3)

- Introduction to S3
- AWS S3 Data Consistency Model
- AWS S3 Storage Classes
- AWS Demo - Create an S3 Bucket
- AWS Configuring S3 Encryption
- AWS Understanding S3 Versions
- AWS Demo of S3 Versioning
- AWS of S3 Lifecycle Management
- AWS Demo Cross-Region Replication

Section 6 - Storage Services

- AWS Content Distribution with CloudFront
- AWS Demo Create a CloudFront Distribution

Section 7 - Introduction to EC2

- VMs, Hosts, and Hypervisors
- Introduction to EC2
- Reserved Instances
- Demo Purchase a reserved instance
- Spot Instances
- EC2 Instance Types
- EBS vs Instance Store
- Demo Create an EC2 Instance
- Demo Connect to an EC2 Instance
- EC2 Auto Recovery

Section 8 - Working with EC2

- Security Groups
- Demo Configure a Security Group
- EBS Volume RAID
- Demo Create a Windows Instance and Configure RAID
- Demo Create a Custom AMI
- Demo Configure EC2 Instance Store
- Working with EBS Volumes
- Add Access Keys to an EC2 Instance
- Demo Assign a Role to an EC2 Instance

Section 9 - Scaling and Availability

- Demo Create a Network ELB
- Auto Scaling
- Demo Create an Auto Scaling Group
- Demo Troubleshoot Auto Scaling
- Demo Remove an ASG and ELB

Section 10 – Monitoring

- CloudWatch
- Demo CloudWatch
- EC2 Status Checks
- CloudTrail

Section 11 - Route 53

- Route 53
- Demo Create a Route 53 Hosted Zone
- Register a Route 53 Domain

Section 12 – Databases

- Database Fundamentals
- Introduction to RDS
- RDS Scaling
- RDS Subnet Groups
- Demo Create an RDS Instance
- RDS Snapshots and Read Replicas
- DynamoDB
- DynamoDB AutoScaling
- Demo Create a DynamoDB Table
- ElastiCache
- Aurora

Section 13 - Virtual Private Cloud (VPC)

- VPC Fundamentals
- Subnets and Security Groups
- VPC Peering
- Demo Create a VPC
- Manage VPC Route Tables
- Access Private Subnets with a Bastion Host

- Network Address Translation (NAT)
- Configuring NAT Instances and NAT Gateways
- Network Access Lists (ACL)
- Create a Network ACL
- Web Application Firewall (WAF)
- Connect a VPC to Your On-Premise Datacenter
- VPC Endpoints

Section 14 - Application Servers

- Simple Queue Service (SQS)
- Simple Workflow (SWF)
- Simple Notification Service (SNS)
- Elastic Transcoder
- Cloud Formation
- Cloud Formation Demo
- Elastic Beanstalk
- Serverless Compute with Lambda
- API Gateway
- OpsWorks

Section 15 - Putting it All Together

- Elasticity and Scalability
- Scaling Up vs Scaling Out
- Reducing Costs

Section 16 - Disaster Recovery

- Backup and Recovery
- Pilot Light
- Warm Standby
- Multisite
- RDS Read Replicas and DR
